submissions:

30 December 2020

Message from the Guest Editors

From tens of thousands of solar-powered LED lights installed in the roads of Senegal or Algeria, through huge photovoltaic arrays deployed in Egypt's or in Morocco's desert regions, today's low cost and highly efficient photovoltaic and photothermal technologies used to produce (generate) electricity and heat are not only ready to eradicate energy poverty in many of Africa's countries, but can also enable the long awaited transition to distributed generation in both urban and rural areas.

The concomitant availability of new low-cost energy storage technologies—the Li-ion battery today and solar hydrogen in the near future—solves the solar energy intermittency issue, making solar electricity available at all times for stationary civil and industrial applications, and for power electric vehicles.

This Special Issue, “Solar Energy in Africa”, aims to provide an answer to these and related questions to eventually provide an authoritative and updated outlook on the recent progress of the use of solar energy in diverse African countries and regions, including the numerous African islands.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2019).
